WHO WE ARE

QUALITY THAT SPEAKS GLOBAL

FIMAKSAN was founded in Sakarya, Türkiye in 1970 as a small workshop and grew into a factory-scale manufacturer of complete sawmill lines. Over 50 years of combining quality with expertise – "doing our job right" – has put FIMAKSAN machines to work in mills across Europe, Asia, Africa and the Americas.

FIMAKSAN USA brings that same machinery to American sawmills with direct factory pricing, US-unit specifications, engineering support, installation crews and spare parts – all through one contact: **Larry Lawrence**.

ASK FOR A QUOTE · 971-272-4272

Irem Fidancı (FIMAKSAN, Türkiye) and **Larry Lawrence** (FIMAKSAN USA) at the factory showroom.

FREE ON-SITE INSTALLATION

Our crew assembles every machine at your mill and hands it over in working condition.

WARRANTY

2 years on mechanical parts · 1 year on electronic and hydraulic parts.

AFTER-SALES SUPPORT

Spare parts, technical support and service – we stay with you after the sale.

HEAVY-DUTY BUILD

Reinforced thick-steel bodies, cast-iron flywheels, SKF bearings – built for tonnage and years of shifts.

HYDRAULIC & PLC CONTROL

Touch-screen networks, servo positioning and remote-controlled carriages come standard on our modern lines.

TURNKEY LINES

From log deck to trimmer and sorter – one supplier for the whole line, one installation, one warranty.

BAND MILLS & LOG CARRIAGES

01

HEADRIG

FI.140 HDG · 55" HYDRAULIC BAND MILL

Our largest headrig: 100 HP main motor, hydraulic blade tensioning and guide adjustment, automatic blade lubrication and a reinforced thick-steel body. Also available as the **FI.140 HDG-T tandem** (double cut) and in 47" (FI.120) and 40" (FI.100) sizes.

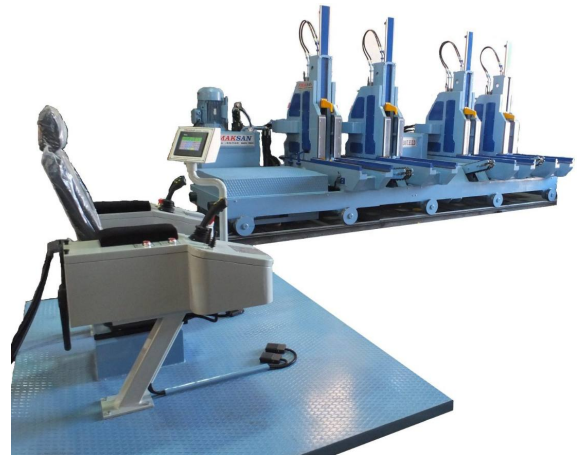

Bandwheel	55$\frac{1}{8}$"	Main motor	100 HP
Max log height	59"	Max cut width	27"
Tension / guides	Hydraulic	Blade (max)	7.1" x 0.055"

CARRIAGE

FI.130 UHKD · REMOTE-CONTROLLED LOG CARRIAGE

Hydraulic 3- or 4-headblock carriages with joystick or on-carriage control, PLC networks and log turners. Sizes from the pallet-mill **FI.100** (2 HB) to the **FI.160 tropical** carriage for 45" + hardwood logs.

Log diameter	up to 45"+	Headblocks	2 · 3 · 4
Control	Remote / on-carriage	Daily capacity	≈17,000 bd ft/log line

Watch it cut. Digital carriage + tandem band mill, Malaysia and Gabon hardwood installs, Romania full line – all on fimaksanusa.com/videos.html

RESAWS & CHIPPER CANTERS

HORIZONTAL RESAW

FI.100 HYM · 40" HORIZONTAL RESAW, 1–3 HEADS

Thick-wall steel body, cast-iron flywheels, steel feed chain and color touch-screen PLC networks with memory positions. Run one head, or stack two or three heads in line with a run-around for multi-board recovery. Vertical hydraulic resaws (FI.100 / FI.120 HDG) also available.

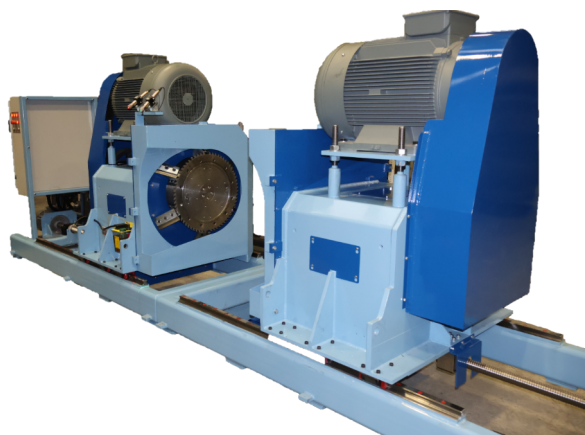

Flywheel	39$\frac{3}{8}$"	Main motor	40 HP
Cut width	17.7" (23" opt.)	Cut height	up to 11.8"
Feed speed	33–197 ft/min	Weight	7,400 lb

CANTER SLABBER

FI.55 CNT-6 · CANTER LOG SLABBER, 6 KNIVES

Turns slabs into chips before the log reaches the saw – eliminating the resaw pass and the slab conveyor, and putting more of the log into lumber. Also available as a **twin canter** for log chipping lines and profiling (scragg) mills.

Circular saw	23$\frac{7}{8}$"	Chipper head	31$\frac{1}{2}$"
Max chipping depth	3"	Positioning	9"/sec
Main motor	100 HP	Weight	≈6,600 lb

Factory spec sheets in US units for the FI.140 & FI.120 band mills, FI.100 HYM-1 resaw, FI.55 CNT-6 and FI.60 cross cut are ready to download at fimaksanusa.com/specs.html

MULTI-RIP SAWS, EDGERS & CROSS CUTS

03

SERVO TECHNOLOGY

FI.150 ADM · MULTI-RIP SAW + EDGER, 3 FIXED / 4 MOVABLE SAWS

Servo-positioned movable blades set widths in seconds from the touch screen – one machine that edges, rips and recovers. Fixed-blade multi-rip saws, 2-spindle rip saws and horizontal edger-splitters round out the range.

Max height	5.9"	Max width	31.5"
Working width	39.4"	Saw diameter	20.9"
Min. blade spacing	0.7"	Feed	33–344 ft/min

FI.60 DOBK-4 servo cross cut

Digital automatic cut-off saw, 13 ft outfeed, ±0.2 mm repeat accuracy, narrow- and wide-cut modes. Pneumatic FI.30 / FI.50 also available.

Trimmer saws

1 fixed + 1 or 2 movable saws for end-trimming to length at line speed, integrated with transverse lumber conveyors.

Sharpening & blade welding

Diamond-wheel band saw sharpeners, butt welder/annealers, tensioning-leveling and stellite tipping – keep your own blades in top shape.

Every machine is delivered in working condition. Voltage options, freight to your mill and lead times are quoted up front – no surprises.

CONVEYORS, OPTIMIZATION & MOULDERS

04

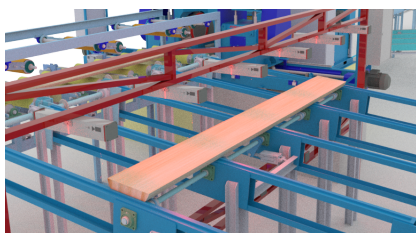

CONVEYOR SYSTEMS

FROM LOG DECK TO GREEN CHAIN

Hydraulic and mechanical log-loading ramps (13 ft / 20 ft), log unscramblers and infeed decks, longitudinal and transverse log conveyors, roller plank conveyors, chain transfers, quick ejectors and stand-by conveyors – every piece engineered to match the machine it feeds.

Log ramps	4 m / 6 m	Transverse conveyors	8–13 ft
Roller conveyors	7–8 m	Drive	Hydraulic / electric

Optimized grade-scanning line

Scanner-driven grading and trimming line that decides the best cut for every board automatically – more grade, less waste.

FM-series 4-side moulders

FM-423A, FM-523B and FM-623C profile machines – 4 to 6 spindles, up to 230 mm working width, 7–28 m/min feed.

Log loading & cleaning

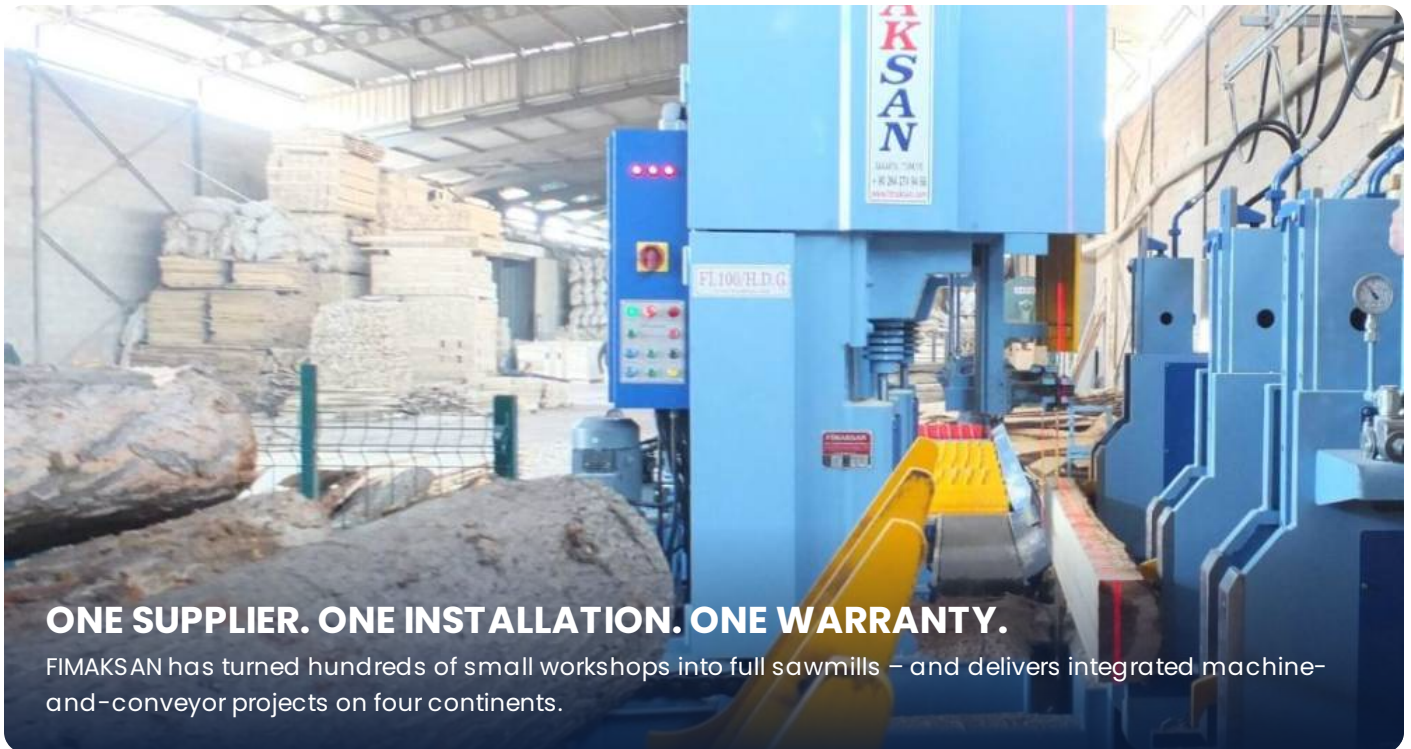

Hydraulic log ramps with closing arms, log cleaning disks and scribes protect your blades from grit and bark.

Used machines – factory-refurbished FIMAKSAN resaws and complete double-line sawmill packages come up regularly. Ask Larry what's available.

USED MACHINES

COMPLETE TURNKEY SAWMILL LINES

05

ONE SUPPLIER. ONE INSTALLATION. ONE WARRANTY.

FIMAKSAN has turned hundreds of small workshops into full sawmills – and delivers integrated machine-and-conveyor projects on four continents.

1

CONSULT

Tell Larry your species, log sizes, target capacity and building – we lay out the line in metric and US units.

2

BUILD

Machines are manufactured at the Sakarya factory, tested and prepared for export.

3

INSTALL

Our team assembles the line at your mill free of charge and commissions it in working condition.

4

SUPPORT

Spare parts, technical support and warranty – 2 yr mechanical, 1 yr electronic & hydraulic.
